Northwind Sales Dashboard

Business insight report based on the supplied dashboard screenshots | ***Prepared by Vithya Sri***

Dashboard overview

The dashboard combines sales, order volume, freight, quantity, customer count, product detail, category mix and employee activity. Filters show a 2013-2015 year range plus company name and category selections.

Headline figures: Total sales 1.27M | Total orders 830 | Quantity sold 51K | Customers 91 | Total freight 63.9K | Average freight 79.05

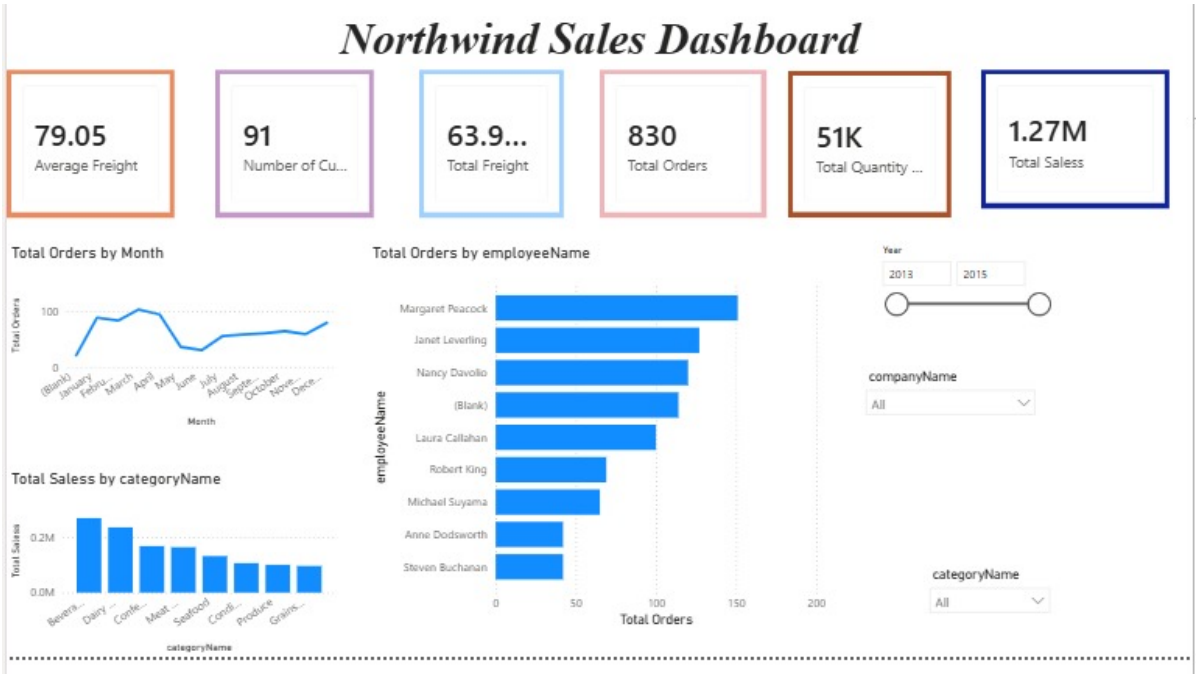

Figure 1. Supplied Northwind Sales Dashboard overview

1. KPI and commercial performance analysis

Visible dashboard measures, with interpretation limited to the supplied screenshots

KPI	Visible value	Reading
Total sales	1.27M	Dashboard headline measure
Total orders	830	Count of orders shown
Total quantity sold	51K	Volume measure shown
Number of customers	91	Customer count displayed
Total freight	63.9K	Freight measure displayed
Average freight	79.05	Average freight per order

The screenshots show sales of 1.27M alongside 830 orders, 51K units and 63.9K total freight. They give a commercial snapshot but do not show cost of sales, profit, margin, returns, or currency.

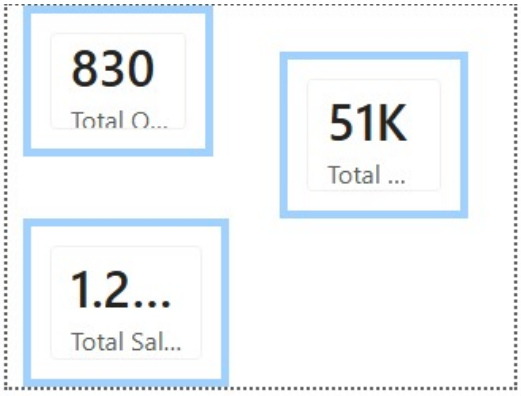

Figure 2. KPI cards: total orders, total quantity and total sales

Data caution

- Do not infer profitability from sales and freight alone.
- Treat values as dashboard totals, not audited financial statements.

2. Sales mix and order trend

Category sales and monthly orders shown in the supplied dashboard

Figure 3. Monthly orders, category sales and employee orders

Monthly trend

Orders peak around March-April (about 100), fall sharply in May and June, then recover gradually toward December. This is a pattern observation only; it does not explain the cause.

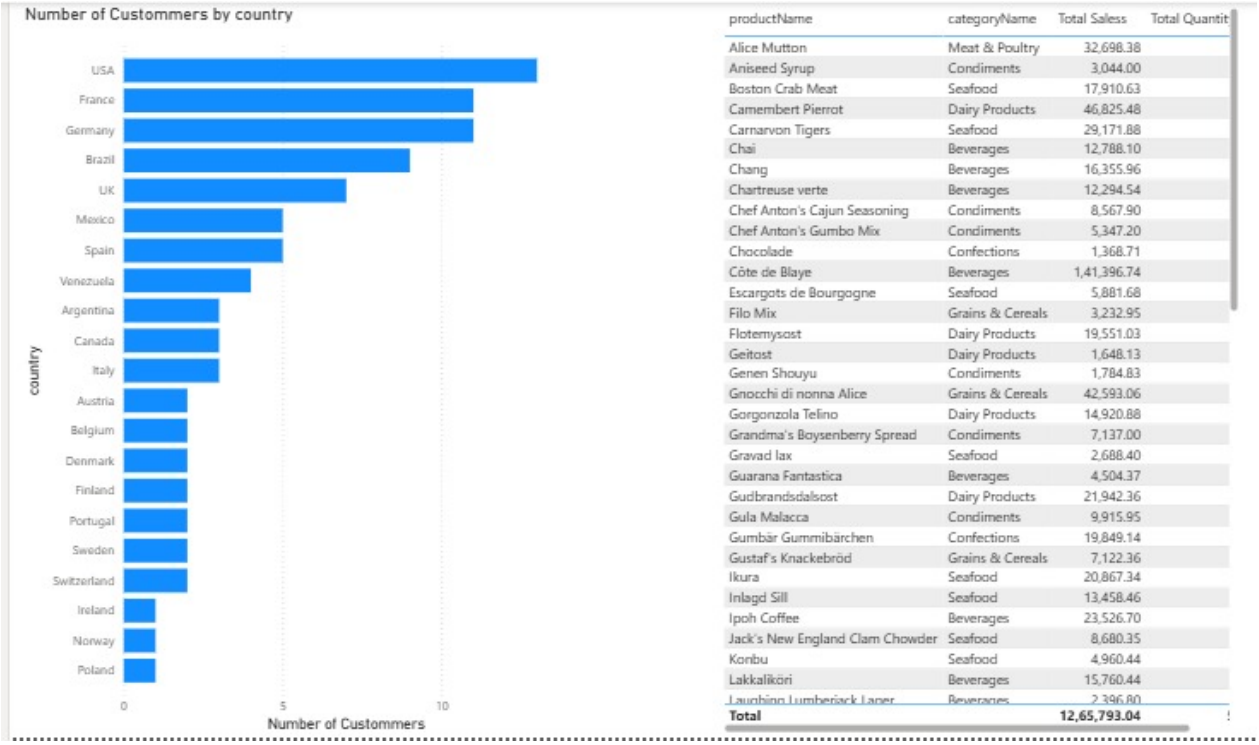

Category mix

Beverages and Dairy Products lead the sales-by-category chart. Other categories cluster at lower levels, with Grains & Cereals at the bottom of the displayed mix.

Chart values are visual estimates where labels are not printed.

3. Product and employee performance

Visible product-level table, customer-by-country ranking and employee order ranking

productName	categoryName	Total Saless	Total Quantit
Alice Mutton	Meat & Poultry	32,698.38	
Aniseed Syrup	Condiments	3,044.00	
Boston Crab Meat	Seafood	17,910.63

Laughing Lumberjack Lager	Beverages	2,396.80	
Total		**12,65,793.04**	

Figure 4. Customers by country and product table

Product-level observations

The product table shows product name, category and total sales. USA, France and Germany have the most customers. The visible extract is partial, so it does not establish a complete product ranking.

Employee performance

Margaret Peacock leads the employee order chart (about 150 orders), followed by Janet Leverling and Nancy Davolio. The chart includes a "(Blank)" category, which merits a data-quality check before use in accountability or incentive decisions.

4. Business insights and recommendations

Actions grounded in the visible dashboard patterns

Observation	Recommendation
Sales of 1.27M, 830 orders and 51K units set the scope of the dashboard.	Pair the dashboard with margin, returns and discount measures before profitability or pricing decisions.
Monthly orders drop sharply in May and June before recovering later in the year.	Review order timing, stock availability and customer activity for those months before assuming a seasonal cause.
Beverages and dairy lead category sales; the employee chart includes a blank record.	Use category leaders for targeted review and resolve the blank employee assignment before performance management.

5. Conclusion and data notes

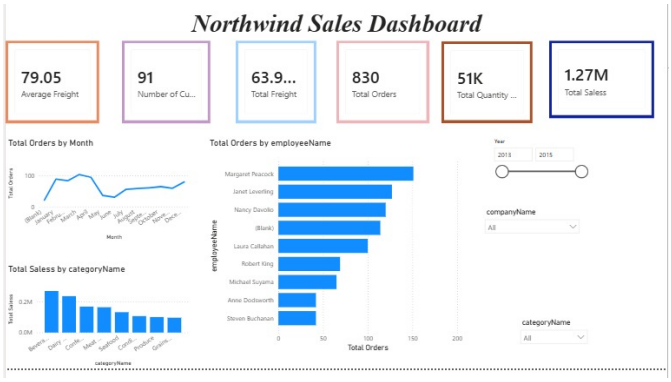

Summary of what the supplied dashboard supports

Conclusion

The dashboard gives a concise commercial view of Northwind activity: 1.27M in sales, 830 orders, 51K units, 91 customers, plus category, country and employee breakdowns. It supports trend monitoring, mix review and data-quality checks, but not conclusions about profit, margin, or the causes of the monthly order pattern.

Data notes

- All figures come from the supplied screenshots; chart readings are visual estimates.
- Year slider shows 2013-2015 with company name and category filters; applied filter state is not documented.
- The product table is a partial list.
- No cost, profit, margin, currency, discount or returns data appears.
